## The joker full movie online free

The Joker gets a movie about origin. It was announced earlier that Todd Phillips, creator of the Hangover films, will write and direct the film, and Martin Scorsese will produce it. And now there is growing speculation about who will play. The infamous role was played by Jack Nicholson, Heath Ledger, and is currently played by Jared Leto. But who has the simultaneous dramatic and comedic skills to take on the costume as a young, growing version of the villain? Here are our choices – some feasible and some completely out there. Will Poulter Will Poulter | Daniel Leal-Olivas/AFP/Getty Images He's not once again cast a Brit in an American comic book role, but Will Poulter is a solid choice to play a young version of The Joker. He has some solid comedic performances under his belt, like Kenny in We're the Millers, but we also know he can tackle serious parts like this summer's Detroit. Poulter's clown makeup is not a new idea - he was originally cast in IT as Pennywise, but later dropped out. With eyebrows like those and his charming demeanor, Poulter's name should definitely be included in the conversation. Evan Peters Evan Peters | Daniel Leal-Olivas/AFP/Getty Images While many on this list have played both dramatic roles and lighter fare, few have dealt with the particular spooky comedy that the Joker requires. But Evan Peters certainly does. As the versatile star responsible for several of your favorite (and least favorite) American Horror Story characters, Peters clearly knows the intersection of crazy and camp needed for this part. We also laughed at his side in two X-Men movies, so we know he can handle the world of great superheroes. Cameron Monaghan | Gabriel Bouys/AFP/Getty Images Currently playing on Gotham Fox as a tv answer to the Joker, Cameron Monaghan looks like the obvious choice for a film adaptation. The actor has been in business since he was a child and was a standout on Shameless Showtime, where he plays a teenager-turned-young adult who struggles with his mental health. Although he doesn't specifically play the same character on Gotham, we're already seeing a potential origin story playing on the show. So it might make sense to see a person who has so adeptly captured the madness of the screen taken to another platform. But it's unlikely that Warner Bros. will go that way. Karen Gillan Karen Gillan | Robyn Beck/AFP/Getty Images Let's look at gender-bend, okay? While this seems like an unlikely path for the studio to make, it's always worth seeing what might have been if they had decided to think outside the box - and besides, DC's universe's most acclaimed solo film so far is female-led. Karen Gillan is currently busy playing Nebula in the Marvel Cinematic Universe, but she was recently asked about other characters she would like to play. She replied: I'll say something DC, and I'll play the Joker. Maybe a Joker woman. Added Call me and let them know that I am available. We're on board. Lakeith Stanfield Leon Bennett/Getty Images for Essence Another Actor Who Tries to Be a Joker? Lakeith Stanfield, who recently sent out a provided tweet: Scorsese would like to play the Joker. Stanfield could be an excellent choice for the part. Having got his start as Marcus in the short term of 12, he's quickly put on a number of phenomenal performances, including his understated role in Get Out. As one of the most-watched up-and-comers in the industry, Stanfield is busy, but it looks like he's more than willing to make it work if he was cast by DC. Iwan Rheon Iwan Rheon | Tim P. Whitby/Getty Images His comedic chops are relatively invisible, but if you're familiar with his work on Misfits, you know that Iwan Rheon has a great range. It's a little busy on Marvel TV right now, but let's be real: There's very little chance of inhumans getting Season 2. Of course, his most high-profile role, and one that really sells this choice, is his villainous turn on Game of Thrones as Ramsay Bolton. What's more, the faces he makes are pretty damn chilling. Talk about joker vibes. Pete Davidson Pete Davidson | Alberto E. Rodriguez/Getty Images Ledger was a young actor with mostly comedic credits to his name before playing the Joker, so maybe that's the way casting should last this time. The comedian is almost exclusively known for his time on Saturday Night Live, and his credit list isn't too long. But there's something about pete davidson's appearance that just screams the Joker. Davidson doesn't seem to be super busy right now, and he'd probably have a relatively cheap rental, so to say. We know he can play crazy characters, and by mouthing that big (figuratively and literally, as he himself joked about), he might just be the perfect person to step into Summer's shoes. Bonus: Taylor Swift Taylor Swift in Blank Space Music Video | Big Machine Records Listen to us. If you've seen look what you put me into the video, you know what Swift is capable of when it comes to playing crazy. Even if you don't, the media has certainly made her a villain. Swift checks almost every box: She's young, she behaved comically and would certainly be a unique choice for the role. And do you remember this look in the music video Blank Space? It kind of resembles Ledger's Joker. But the chances that this pop star will jump back into acting, even for a role as big as this, are basically nonexistent. Check out Cheat Sheet on Facebook! Keep up with the latest daily buzz with the BuzzFeed Daily newsletter! Source: Thinkstock You probably already know that DVD and Blu-ray discs are slowly but surely going the way of VHS tapes, as people increasingly go into online services to buy, rent and watch movies. While some may mourn the loss of material in our daily lives, online-based film-watching eliminates problems with or damage fragile discs and makes movies available on different platforms so you can watch movies that you own anywhere, anytime without having to remember to grab a DVD. Of course illegal downloading and streaming is very popular, but it deprives many people who have worked to make a movie about the compensation they deserve for their blood, sweat and tears. In addition, the available options can often be of poor quality and risk infecting your computer or mobile device with a virus if you don't know what you're doing. Here's a guide to the many different legal ways to watch movies online for those who aren't familiar with the process who are eager to break free from the scratched-DVD hell. Yes, it will cost you a little money, but there are many benefits both through traditional DVDs and illegal downloads. Streaming services There is a litany of online content tracking capabilities. One of the most popular methods is to use online streaming services such as Netflix, Hulu Plus, or Amazon Prime Instant Video. These services charge either a monthly or annual fee and give you access to tons of content, although there's always a chance that the particular movie you're looking for won't be on whatever streaming service you have. The content accessed by these services changes constantly as you close new stores, so you're not stuck with the same options month by month. The above services are also great for TV-watching and have started making their own original shows to compete in the TV market. Many of these shows, such as Netflix's House of Cards and Orange is the New Black, have received glowing reviews. There are several limited options for streaming online that are legal and free. Crackle is a website that offers movies and TV shows to stream for free, but it is ad-supported and you end up seeing about as many ads as you would watch programming on cable. The amount of content Crackle offers is also a slimmer choice than subscription services because the site doesn't have the financial muscle to make giant content purchases such as larger sites, so it might be harder to find your favorite movie. The downside of an online streaming service is that you're at the mercy of the content available to the company; You can't just pick any movie under the sun and be guaranteed to be able to watch it. You also don't own movies, so if Netflix gets rid of your favorite movie you'll find yourself unable to watch it. Downloading one way to own movies and watch them online is to download them. Whether you're a fan of Google or Apple, both iTunes and the Google Play Store offer movies to buy through accounts that become yours. The new version costs around \$20, about the same price that a DVD would cost, although a digital copy cannot be lost or damaged. Of course, buying individual titles on your own is more expensive than paying a small fee for a streaming service and gaining access to content odes. iTunes and Google also offer movies for rent at a lower price. Renting gives you the ability to watch a movie once every 30-day period and 24 hours to complete after clicking play. These options are also great for switching between devices because iTunes and Google Play will remember where to be in the movie if you are interrupted and want to switch from TV to tablet or smartphone. Amazon offers movies to buy or rent at similar price points to Apple and Google, and you don't need a Prime membership to access the service. Whether you prefer to own or stream movies, watching movies online is the way to go if you're sick of dealing with DVDs and Blu-ray discs. There are many safe, legal options that don't cost too much and allow you to monitor on all your devices at your convenience. Check out The Fun Cheat Sheet on Facebook! More from Fun Cheat Sheet:
